

# Neo Mokhele

## Frontend Developer

As a front-end developer, I have a wide skill set and a strong ambition to create engaging and responsive web and mobile experiences. With a strong foundation in HTML, CSS, and JavaScript, I've honed my abilities in creating user-friendly interfaces that adhere to design criteria while stressing usability and performance.

## WORK EXPERIENCE

### Frontend Developer - (Feb 2022 - Present)

Reecheble (Pty) Ltd.

Remote Full-time

Utilise React Native's state management capabilities, such as Redux or React Context API, to manage application data and ensure optimal performance.  
Create interfaces for interacting with RESTful API endpoints while integrating with backend services via Node.js.  
Manage and manipulate data with ease, including data storage and retrieval from MongoDB databases, while maintaining data integrity and security.  
Conduct comprehensive testing of the application, including unit test, integration tests, and end-to-end test, and employ debugging tools to diagnose and resolve issues.  
Use Git for version control and collaborate with the team

### Junior Web Developer - (Aug 2018 - Apr 2021)

Talk360 Africa (Pty) Ltd. Fourways, Johannesburg, South Africa

On-site Full-time

Developed and maintained websites using a combination of technologies, including Laravel, Vue, WordPress, PHP, JavaScript, CSS, and HTML.  
I worked on server-side development duties like database management, server setups, and API integration using Laravel and PHP.  
Maintain a pleasant user experience, identify and resolve faults in websites, and content management systems.  
Manage and update material on WordPress websites, customise themes to meet project design and functionality needs using PHP custom templates and functions.  
Improve page load time, optimise website performance, image compression, and script loading.  
To manage code repositories, track changes, and work successfully with team members, use version control systems like Git.

## PROJECTS

### Campus Website Development

10/2021-02/2022

Design, code, test, and maintain software applications, ensuring they meet project requirements and specifications.  
Analyse complex problems, identify root causes, and develop efficient solutions. Debug and troubleshoot software issues as they arise.  
Work closely with cross-functional teams, including product managers, designers, and other developers, to ensure alignment on project goals and deliverables.

## EDUCATION

### Diploma in Information Technology

Damelin College

Information Technology

02/2016-12/2019

Modules included:  
Web Development Fundamentals, Java Fundamentals, C# Essentials, Project Management, Information Systems, Networking Fundamentals.

## CERTIFICATES

Certificate: Become a Software Engineer

10/2020-12/2020

Certificate: Developing Web Applications with PHP

07/2019-12/2019

## SKILLS

- RESTful API
- Laravel
- PHP
- React Native
- React.js
- MongoDB
- MySQL
- JavaScript
- Node.js
- GIT

## LANGUAGES

- English
- SeSotho
- Afrikaans
- isiZulu

## INTERESTS

- Problem solving
- Responsive design
- UI/UX principles
- Open source contributions
- Tech meetups and conferences
- Mentoring and teaching
